

# **Pediatric Multi-Coverage Insurance Scenarios**

Please be aware that anesthesia and dental services are provided by two independent entities with separate fees.

## **Private Dental Insurance Dual Coverage**

Our anesthesiologists are not credentialed providers with private insurance companies. Payments are expected in full prior to the rendering of general anesthesia services. A bill will be furnished to the patient after payment has been received and treatment rendered. The patient will be responsible for obtaining reimbursement directly from their insurance company. Fees vary based on patient age, medical history, and surgical complexity. See private fee section.

## **Delta Dental Insurance/AHCCCS Dual Coverage**

Delta EOB is required for these patients. AHCCCS will not permit for general anesthesia billing without Delta EOB.

## **Out of Pocket Check Payment Accepted by the Dental Office**

Arizona Dental Anesthesia does not accept personal checks directly from patients. Some offices will accept payment for anesthetic services on behalf of Arizona Dental Anesthesia. The offices will make direct payment to Arizona Dental Anesthesia.

I have read, understand and agree with the above **estimate** of fees.
